Course Title: Mathematics – Grade 7

Course Number: 00204

Course Prerequisites: Completion of Mathematics – Grade 6, 60% year average and basic operations w/o calculator usage

Course Description: (Include “no final exam” or “final exam required”)

In Grade 7, instructional time will focus on four critical areas: (1) developing understanding of and applying proportional relationships; (2) developing understanding of operations with rational numbers and working with expressions and linear equations; (3) solving problems involving scale drawings and informal geometric constructions, and working with two- and three-dimensional shapes to solve problems involving area, surface area, and volume; and (4) drawing inferences about populations based on samples. A final exam is given.
