COURSE DESCRIPTION

Course Title: Social Skills II

Course Number: 00634

Course Prerequisites: _____

Course Description:

Instruction in Social Skills has been shown to positively influence adolescents. Benefit has also occurred for students with disabilities, including learning disabilities and those with emotional and behavioral disorders. Additional evidence supports social skills instruction for individuals with lower incidence disabilities such as traumatic brain injury, schizophrenia, and Asperger's Syndrome. Social skills instruction results in a more positive school climate and more time for teachers to spend on academic instruction instead of discipline, leading to a more rewarding learning and teaching experience.

Skill streaming is an evidence-based strategy designed to systematically teach social skills to address the needs of students who display aggression, immaturities, withdrawal, or other problem behaviors. The Skill streaming process focuses on four principles of learning. These learning procedures—modeling, role playing, performance feedback, and generalization training—have been used to teach a variety of behaviors, from academic competencies to sports, daily living skills, and vocational skills.
