**Course Prerequisites:** Algebra I – CP

**Course Description:** Algebra II College Preparatory is one of three courses in the academic sequence. Algebra concepts are an integral part of secondary math courses. This course expands on the foundation of algebraic theory that was begun in Algebra I. It uses practical problems to connect algebra to real world and apply the theory introduced in Algebra I, going from linear equations and inequalities to complex numbers. It includes the study and applications of quadratics including parabolas. This course is intended for students planning on pursuing higher education, particularly those whose primary interests are in fields that require a strong background in math or science. A grade of 75% or higher is earned in Algebra I or with a recommendation by the Algebra I teacher. A final exam is required.
